## Career Objective

---

I build clean, responsive websites and believe that participating in real projects will enhance my practical experience, help me learn new technologies, and allow me to grow within a team.

## Technical Proficiencies

---

### Lang & Markup

HTML5, CSS3, JavaScript (ES6+)

### Frameworks | Libs

React, Bootstrap, Tailwind-CSS

### Tools | VC

Git, GitHub, VS code

### UI | Design

Responsive Design, US Design Standards, CSS Animations, Flexbox/Grid

### Other

DOM Manipulation, Event Handling, State Management, REST API, JSON

### Currently learning

TypeScript, Next.js, Figma

## Project

---

**Explore AZ** - | <https://explore-az.vercel.app/> | 🔗

**Overview:** A fully responsive web platform designed to help tourists and locals explore Azerbaijan easily, showcasing popular destinations, informative descriptions, and a user-friendly interface with a modern and engaging design.

**Goal:** The goal of this project is to expand it into a mobile application in the future, continuously update content such as prices and descriptions, and add more features to make it even more useful for tourists and local residents.

**Technologies:** TypeScript, React, Tailwind CSS

Demo | GitHub

**Landau School Service** - | [landau-school-service.vercel.app](https://landau-school-service.vercel.app/) | 🔗

**Overview:** A fully responsive web platform for Landau School Service that helps parents and school staff track student transportation safely with real-time updates and an easy-to-use interface.

**Goal:** To expand into a mobile app in the future, add advanced tracking and notifications, and continuously improve safety and convenience for students, parents, and school staff.

**Technologies:** HTML, CSS, JavaScript, React

Demo | GitHub

**Karabakh Horse's** - | <https://karabakh-horses.vercel.app/> | 🔗

**Overview:** A modern website showcasing the uniqueness, beauty, and strength of Karabakh horses to the world.

**Goal:** The goal of this project is to expand and enhance it further in the future.

**Technologies:** HTML, CSS, JavaScript, React.

Demo | GitHub
